

# 2010 OSHA Compliance

Presented by Eagle Associates

## Presentation Topics

This is a management level presentation that assumes a practice has implemented the basic requirements of safety and OSHA related requirements. The focus will be on current management issues and interpretive guidelines, and will review primary OSHA regulations and how to organize safety compliance in the practice. Topics include:

- Administrative requirements (i.e., record keeping and documentation)
- Bloodborne Pathogens – updating the Exposure Control Plan and sharps management. Includes guidelines for medical waste management and Department of Transportation requirements.
- Hazard Communication - Identifying chemical hazards and MSDS management
- TB Infection Control – Annual Risk Assessment, Tuberculin skin testing, and employee medical records documentation.
- Influenza Safety - Policies and procedures for seasonal and pandemic influenza.
- Ergonomics - Review of OSHA requirements and neutral body positioning.

Questions are addressed during the course of the seminar to provide an interactive presentation. Seminar materials are provided in a workbook format to allow ample notes during the presentation

## Who Should Attend

\*This seminar is recommended for managers or other individuals with responsibility for OSHA and Safety compliance. This would include practice managers and administrators, safety officers, privacy officers, and other individuals with similar responsibilities in the practice.
