

Accelerate Your Practice On the IT Super Highway

hvpa
Huron Valley
Physicians Association P.C.

In an increasingly complex healthcare environment, physicians need to be able to access information to keep up with the requirements and demands placed on them by patients and payers.

MyWorkspaceSM is a secure, easy-to-use web portal that connects clinical applications such as e-prescribing (e.g. DrFirst), patient registry tools, labs, secure messaging, and more. **All of these applications are accessed through a single sign-on with your unique user name and password.** No more having to remember multiple passwords!

MyWorkspaceSM has the added benefit of connecting you to my1HIESM, the health information exchange designed and built by physicians. MyWorkspaceSM facilitates data and simplifies technology so that you and your staff have the information and tools necessary to do what you do best; provide high-quality care for your patients.

Features

Wellcentive[©] Patient Registry

Comprehensive preventative care and chronic disease management solutions that physicians can utilize at the point-of-care to provide higher quality and more efficient healthcare. The registry offers a clinical data repository, comprehensive reporting tools, population management, evidence-based care, and outreach programs to assist providers in managing their patients' chronic conditions.

e-Prescribing

Designed to assist physicians run safer and more efficient practices. Providing more information at the point-of-care, eliminating the prescription pad, and preventing adverse drug interactions.

e-Labs

Order tests and receive results online as soon as they are processed. Available online from any location with an internet connection, e-Labs interface is a flexible solution capable of enhancing patient care.

Secure Messaging

Email messaging on a HIPAA-compliant secure platform that can be used to share patient information between physicians and other healthcare entities.

Document Manager

Utilizes electronic virtual faxing which allows you to send and receive right from your desktop. Saves time and money by reducing operational costs of paper, toner and maintenance. Document Manager also enables you to electronically store any paper or electronic document.

Resource Center

An electronic file cabinet that can serve as a place to house frequently used documents and forms, which is available anywhere you have access to the internet.

Physician Finder

Look up physician information including NPI numbers, phone numbers, fax numbers, and office location(s). Also allows you to print out maps and directions to referring physicians for your patients.

Benefits

- Simple to integrate into your practice
- Programs to help you earn incentive dollars
- Easy to use regardless of your technical experience
- Affordable
- Subsidy support
- Customized training and implementation included
- Accessible anywhere you can connect to the internet
- Improve quality of care
- Reduce operational costs
- Position practice for future Patient-Centered Medical Home designation
