

Between Medicine & Malpractice:

The Gray Matters

Presented by ProAssurance
Sponsored by HVPA

This seminar explores the risks inherent in common situations faced by physicians in all specialties. Through case studies, news reports and claims data, we'll show physicians how time-honored risk management "truths" may require a second look and how "what we've always done" may not be optimal for reducing risk.

Recognizing that physicians regularly face barriers in patient safety and loss prevention techniques, this seminar offers guidance to physicians who find themselves "in the gray area" of risk management.

Learning Objectives:

Participation in this seminar will better enable participants to:

- Evaluate current practice patterns to identify areas of risk in your practice;
- Develop risk management techniques that positively impact patient safety & outcomes; and
- Implement realistic risk reduction strategies in accordance with the needs and demands of your practice.

*When

- April 13, 2010 - 6pm-8pm
- April 26, 2010- 6pm-8pm

Physicians only need to attend one of the sessions. Sign in and a light dinner begin at 5:30pm for both sessions.

*Where
