

Opioid & Pain Management

March 21, 2018 | 6 pm to 7:30 pm
@ Michigan Heart Auditorium

In this educational session, David Cooke, MD and Michael Englesbe, MD from Michigan Medicine will discuss best practices and strategies for opioid and pain management, including methods to better identify patients' history with opioids and designing care plans that minimize the use of opioids.

Physicians can earn 1.00 AMA PRA Category 1 credit for attending this session.

Who Should Attend |

Attendance is no longer mandatory. However, attending can earn membership tier points (at least one physician from your practice must attend to qualify). Additional clinical and administrative staff are also welcome to attend.

If you have questions, contact Alicia Majcher at majchera@hvpa.com or (734) 634-9765.

RSVP |

To receive CME credit please RSVP to info@hvpa.com with the name of each physician attending. (If you already have, no need to reply again.)

Speaker Biographies |

Dr. David Cooke graduated *summa cum laude* from Brandeis University, and attended medical school at the University of Michigan. He completed his internship and residency at the University of Wisconsin, and returned to the University of Michigan as faculty in 1999. As a general internist, his professional interests include preventative care, diabetes, heart disease, and mental health. In 2011, he pursued training in medical management of chronic pain, and he now also provides consultative care through the General Medicine Pain Service and the Anesthesia Back and Pain Center. Dr. Cooke enjoys astronomy, strategic gaming, science fiction, model rocketry and he has had a number of medical and non-medical publications.

Michael Englesbe, MD, FACS is the Cyrenus G Darling Sr M.D. and Cyrenus G Darling Jr M.D. Professor of Surgery at the University of Michigan in the Section of Transplantation Surgery. Dr. Englesbe received his undergraduate degree at Yale University in New Haven, Connecticut in 1993. He went on to obtain his medical degree in 1997 from the Robert Wood Johnson Medical School and completed his general surgery residency at the University of Michigan Health System in 2004. From 2000 to 2002, Dr. Englesbe did a surgical research post-doctoral fellowship at the University of Washington Medical Center in Seattle, Washington. He does kidney and liver transplantation in adults and children. He has a specific expertise in portal hypertension in children and adults.
